

What is vis|ability Capture Client?

The **Capture Client** agent is an encoding tool that enables vis|ability to acquire content from any network connected computer and deliver that content to any defined endpoint. It is able to intake an entire desktop, one or multiple screens, a single application, or predefined area of the desktop—all while maintaining high security and network efficiency.

✔ Flexible Content Capture

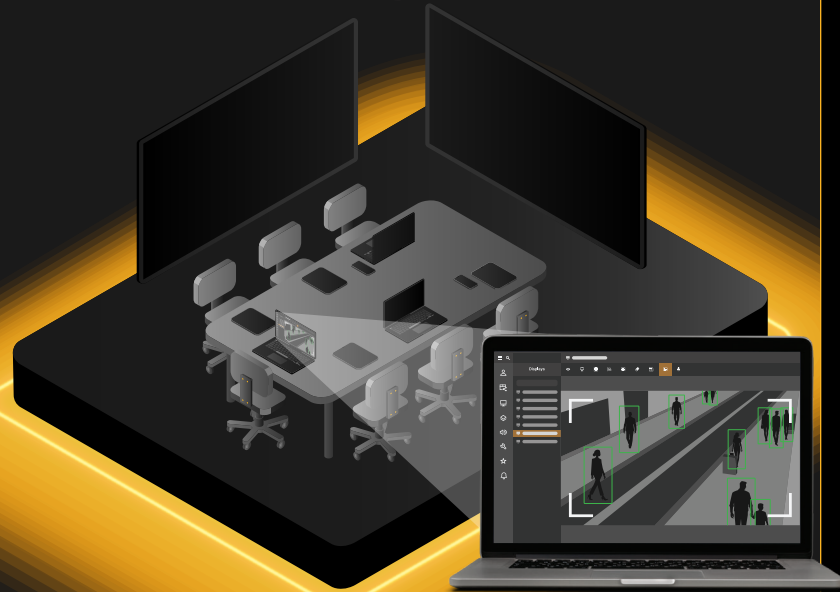

Supports capturing entire desktops, specific screens, individual applications, or predefined desktop areas to meet diverse operational needs.

✔ Secure and Efficient Encoding

Maintains high security and network efficiency while encoding and transmitting content across the vis|ability platform.

Crisis Room

Key Benefits

+ Enhanced Collaboration

Enables seamless sharing of critical visual information across endpoints, improving teamwork and decision-making.

+ Operational Flexibility

Adapts to various use cases by capturing and delivering exactly what's needed, from a single application, to multiple screens.

+ Streamlined Integration

Simplifies content acquisition from any network-connected computer, ensuring compatibility and ease of use within existing workflows.

Integrated Operations Center

Specification:

Operating System	Microsoft Windows 10 x64, 11 x64, Server 2012, 2016, 2019, 2022, 2025.
Capture & Encode	Configurable encoding H.264: up to level 5.1, 4K/30 D-JPEG: up to 32000x32000 resolution, 32bpp VNC (supports RealVNC, TightVNC, UltraVNC, others)
Bandwidth	H.264: 6-40Mbps JPEG: 100Kbps+
SoftKVM	Yes, secured through user permissions
View/Distribution	Displays, Desktops, Spaces, Web Client
Security	Personal privacy areas, End-to-End Encryption, FIPS 140-3 compliant
